

S3 - SIMPLE STORAGE SERVICE

Step-1: Search for S3 and Select > Once you select s3 it shows the console like this and click select bucket > Create bucket by giving bucket details Under Object Ownership, click ACLs enabled > Then click Create bucket > Bucket is successfully created.

Step 2: In Bucket, if you want to store which may be any files store them by selecting the upload.

Step 3: Copy the object URL

The screenshot shows the AWS S3 console with the object 'IMG20220611154822-01.jpeg' selected. In the 'Properties' tab, the 'Object URL' field is highlighted with a green border, and a tooltip says 'Object URL Copied'. The URL itself is also highlighted with a green border.
